peskarenje STAKLA

Peskareno staklo od davnina koristi se za oplemenjivanje prostora. Kompletно peskareno ili po motivu upotpunjuje prostor oko sebe dajući mu novi izgled i dimenziju.

Peskarenje stakla kao tehnika prisutna je u arhitekturi u projektovanju kako enterijera tako i eksterijera. Svoju primenu nalazi najvećim delom za vitrine, staklene ploče za stolove, vrata, tuš kabine i ograde.

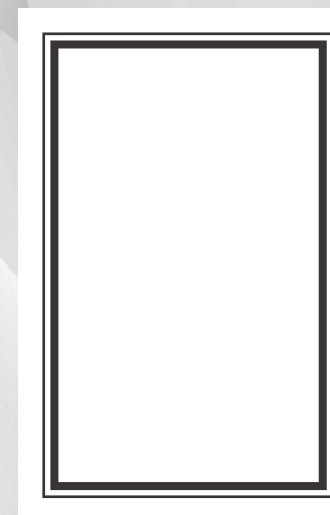

U mogućnosti smo da ponudimo veliki broj motiva za peskarenje koji se lako prilagođavaju različitim dimenzijama stakla, takođe možemo izraditi motive po Vašoj želji i uzorcima. Peskarenje stakla je postupak obrade stakla koji ostavlja trajnu šaru na staklu, čini ga neprovidnim, ali ne gubi na intenzitetu svetlosti koju propušta.
